

utility.conversion

The diagram consists of two main parts. On the left, a package named 'utility.conversion' contains a nested package named 'CelsiusFahrenheit'. On the right, another package named 'utility.conversion' is shown. A vertical line connects the bottom of this package to a circle with a plus sign, which then connects to a package named 'CelsiusFahrenheit' at the bottom right. This represents a composition relationship.

**CelsiusFahrenheit**
